Mephisto says: “You’re trapped in the center of the underworld and need to find a way out. Unfortunately the journey is quite treacherous. There are four kinds of paths to travel, each a different color, but one kind of path leads to instant death while the others just cause immense pain of different sorts (physical, mental, and emotional). The only endurable route to an exit uses exactly three of the four colors in cyclic order (A, B, C, A, B, C, A, ...) with the color changing at each white circle. Figure out which three colors form such a path and make your way out of these rings of hell. You’ll encounter some numbers along the path. Total the values between each question mark you encounter to spell out a word, proving you escaped.”
